

***MESOGLOW MX 5ml**

Ingredients:

Hyaluronic acid 3.5% , Organic Silicium , DMAE & X-ADN.

Indications:

- Revitalization and hydration of tired or loose skin
- Sagging flaccid skin of the face & Neck Folds.
- Treatment of Wrinkles & Sun-damaged Skin.

Properties:

Hyaluronic acid 3.5%

Pure, Non-CrossLinked Hyaluronic Acid is a highly-effective skin moisturizing agent. Its particular ability to attract and bind water molecules serves to moisturize the skin and maintain the elasticity of dermal and epidermal tissues. When applied to the skin, Hyaluronic Acid forms a viscoelastic film, replicating its natural function of retaining water in the intercellular matrix of dermal connective tissues. This makes Hyaluronic Acid an ideal moisture base, facilitating the delivery of other agents to the skin. It is recommended for treating wrinkled, tired, sun-damaged and dried-out skin.

Organic Silicium

A structural element of connective tissue.Organic Silica hydrates, renews and regenerates cells. It stimulates and regulates fibroblast proliferation, enhances collagen synthesis and promotes the regeneration of elastic fibres.

Organic Silicium smoothes, tones and lifts the skin, slowing down the aging process. It restores strength, flexibility and elasticity to the collagen and elastin of connective tissues.

DMAE

Acts immediately to improve the appearance of sagging, flaccid skin. Its firming action works by protecting the elastin and collagen cross-links.

DMAE provides an instant face or bodylift effect, while defending the skin against free radicals and simultaneously infusing it with moisture

X-ADN

A natural polymer with excellent antioxidant and moisturizing capabilities that protect the cell membranes from oxidative degradation. Its capacity to restore dead cells and reconstruct connective tissue stimulates the healing processes. Nucleic acid combats collagen destruction caused by sun rays, oxidative stress and tobacco. As well as being used in anti-ageing treatments to fight photoageing, X-ADN is able to improve a variety of conditions such as dry skin, wrinkles, stretch marks .X-ADN is composed of Procaine, Thiamine (Vitamin B1), Riboflavin (B2), Niacin (B3),Pantothenic Acid (B5), Pyridoxine (B6).

Protocols:

One vial for 5 sessions

1ml MESOGLOWMX + 0.5 ml Procaine 2%

Inject into fine lines of the face and neck at 1-2 mm depth and rate 0.05ml.

Facial Rejuvenation : 6 weekly sessions.

***MESOFADE MX 10ml**

Ingredients:

Glutathione & Kojic acid. Vitamin C 20%. Glycolic acid.

Properties:

Glutathione

Glutathione plays an important role in cell protection during aging, acting both as an antioxidant and a detoxifying agent. Glutathione is a skin lightening agent with inhibitory effects on melanogenesis, makes it an essential component of melasma and depigmentation treatments.

Kojic acid

It inhibits the activity of the enzyme tyrosinase which is the rate limiting enzyme in the synthesis of the skin pigment melanin.

It decreases melanin content in melanocytes.

It scavengers free radicals

Vitamin C 20%

Potent inhibitory effects on melanogenesis.

Glycolic acid

Complementary inhibitory effects on melanogenesis. Glycolic Acid, is the most common alpha hydroxy acid (AHA). It stimulates new growth of skin, collagen and elastin, as well as working to diminish brown spots and hyperpigmentation. It also reduces fine lines, wrinkles, acne, scars and other signs of aging. Glycolic Acid prevents dead cells from clumping together, thus increasing cell turnover. The skin appears bright and rejuvenated, reflecting a healthy glow.

Protocols

One vial for 6 - 10 treatments.

1ml MESOFADE MX + 0.5 ml Procaine 2%.

Inject 1 - 1.5 ml at 1-2 mm depth (papule) and rate 0.05ml.

Localised Pigmentary Lesions : Once a week for one month.

After the treatment, patients should avoid the sun with the application of sunscreen is a must.

***MESOHAIR MX 5ml**

Ingredients:

Minoxidil , Biotin, Dexpanthenol , Dutasteride & Glutathione.

INDICATION:

This cocktail enhances and stimulates hair growth and is used for prevention and treatment of Androgenetic Alopecia in Males and Females.

Properties:

Minoxidil

FDA approved for treatment of Androgenetic Alopecia (AGA). Hair growth Stimulant. Potent vasodilator.

Biotin (Vitamin H)

Hair growth Stimulant as it readily bind to hair follicles. Biotin, also known as vitamin H, It can be used to alleviate the symptoms of seborrheic dermatitis, eczema and dry skin, as well as combating hair loss and greying.

Dexpanthenol (Vitamin B5)

Hair growth Stimulant as it readily bind to hair follicles. Dexpanthenol promotes normal keratinization of the skin and hair.

Dutasteride

A dual type I And type II 5AR inhibitor, thus effectively and safely used for Males and Females with longstanding androgenetic Alopecia's.

Glutathione

Improves the quality, texture and growth of hair

Protocols

One vial for two treatments.

Inject 2.5 ml of MESOHAIR MX+ 1ml Procaine 2% . at 1-2 mm depth .

Rate of 0.01-0.02 ml .

Hair loss :

Once a week for two months.

Androgenetic Alopecia(AGA):

Once a week for two months.

Once every two weeks for one month.

Once a month for three months.

Once session every three months.

*MESOLIPO MX 10ml

Ingredients:

Phosphatidyl choline, Deoxycholate, L-Carnitine, Artichoke, X-ADN & Caffeine.

Phosphatidyl choline(PPC):

Naturally abundant in cell membranes, this phospholipid, breaks down the fat stored in fat cells. Phosphatidylcholine emulsifies the fat, allowing it to be absorbed into the bloodstream and transported. This makes it the ideal solution for eliminating unattractive, localized adiposities.

Deoxycholate:

Bile acid that enhances PPC action, and necessary for emulsification of fats after they are transported to the liver.

L-Carnitine:

In its natural form in the body, L-Carnitine is responsible for metabolizing fat. After breaking down the stored fat, it mobilizes the fatty acids into the bloodstream, attaching itself to them and carrying them to the area of the cell that converts fat to energy. L-Carnitine is essential for optimal fat burning.

Artichoke:

It has a detoxifying and diuretic action. Also known as Cynara scolymus, with the active ingredient Cynarin, it is widely used to treat cellulite and fat. In addition, Artichoke Extract works to help stimulate the lymphatic drainage system.

X-ADN:

Restores cells and guards against collagen destruction.

Caffeine:

Works to increase blood flow and stimulate adipocytes to release fat into the bloodstream, so that it can be burned by the body's metabolism. When applied topically, it works to act as a lipolytic agent, breaking down the fat tissue and causing localized weight loss, without incurring any side effects.

Properties:

An effective injection lipolysis cocktail with 4 potent lipolytic ingredients: PPC-DOC-L-Carnitine & Artichoke. Artichoke + X-ADN enhance circulatory drainage.

Protocols

One vial for two treatments.

Prepare 10ml = 5ml MX + 1ml Procaine 2% + 4ml N.S.

Inject at 12 mm depth into localized fat areas and rate 0.1-0.2ml.

Localised fat areas: 8 - 12 weekly sessions.
